

Bilal Asif

Front End Developer

I am a dedicated and results-driven front-end developer with 2 years of experience in React. I specialize in building dynamic, user-friendly webpages using HTML, CSS, and JavaScript. With a strong problem-solving mindset, I am adept at tackling complex challenges and delivering high-quality, responsive web applications. In addition, I possess skills in SRS documentation and am proficient in translating requirements into functional, effective solutions. I am seeking to join a dynamic and reputable organization where I can contribute my expertise and continue to grow professionally, applying my knowledge and experience to innovative projects.

Bachelor Degree In Information technology Punjab University College of Information Technology

08/2018 - 09/2022

PERSONAL PROJECTS

Digi Hissab (01/2022 - 10/2022)

- This Application basically a android application. This project is designed for small retailers to keep record of their customers and their personal transactions. This application provides all basic functionalities to its administrator as well as to customers. Such as cash in , cash out, checking credit and monthly report etc. This is final year project which is developed in flutter

Crypto Clone

- This is basically clone of Crypto Website which is developed in ReactJs and other front end Tools like ViteReact. The main purpose of this project is to enhance my front end Skills

WORK EXPERIENCE

Front End Developer Vaival Technology

01/2023 - 02/2025

Lahore

VAIVAL is a consultancy and software development company that provides cutting edge engineering solutions

Achievements/Tasks

- Build and maintain responsive, interactive, and visually appealing web pages using HTML, CSS, JavaScript, and React.js.
- Collaborate with UI/UX designers to implement designs and ensure a seamless and intuitive user experience across multiple devices and screen sizes.
- Ensure consistent look and functionality of websites across various browsers and devices, optimizing for performance
- Optimize front-end code and assets (e.g., images, CSS, JavaScript) for improved page load speed and overall performance.
- Use Git for version control, collaborating with teams and managing project branches effectively
- Build reusable and modular React components for scalable applications, utilizing hooks, state management, and lifecycle methods
- Identify and resolve front-end bugs and issues, ensuring smooth functionality and debugging when necessary.
